

APPLICATION FOR PERMIT

Serial No. 6823

TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

Date of first receipt and filing in State Engineer's office NOV 10 1922
Returned to applicant for correction _____
Corrected application filed _____

The undersigned Curtis Mathews,
Name of applicant
of Fort Bidwell, County of Modoc,
State of California, hereby make S application for
permission to appropriate the public waters of the State of Nevada, as
hereinafter stated. (If applicant is a corporation, give date and place
of incorporation.) _____

1. The source of the proposed appropriation is Snow Creek, tributary
Name of stream, lake, or other source
to Pelican Lake, California.

2. The amount of water applied for is 1.4 second-feet.
One-second-foot equals 40 miners' inches

3. The water to be used for Irrigation.
Irrigation, power, mining, manufacturing, domestic, or other use

4. The water is to be diverted from its source at the following point:
In the south-east corner of the SE4 NW4 of section 22, T 47 N R 17 E,
Describe as being within a 40-acre subdivision of public survey, or by course and distance to a section-corner. If on unsurveyed land, it should be so stated.
M.D.M.

IF THE WATER IS TO BE USED FOR IRRIGATION, SUPPLY THE FOLLOWING INFORMATION:

- (a) Number of acres to be irrigated is One hundred and forty.
- (b) Description of land to be irrigated NW4 of Section 22,
Describe by legal subdivision, or if on unsurveyed land it should
T 47 N R 17 E, M.D.M., excepting therefrom about 20 acres in the
be so stated and a description provided in accordance with special instruction from the State Engineer when application is returned for correction.
north-east corner thereof.

- (c) Irrigation will begin about May 15th and end about
Month
September 30th, of each year.
Month

IF WATER IS TO BE USED FOR POWER, MINING, TRANSPORTATION, OR OTHER USE, SUPPLY THE FOLLOWING INFORMATION:

- (d) Power to be developed is _____ horsepower.
- (e) Works to be located _____
Give 40-acre subdivision on which works will be located, or locate by course and distance to a section-corner.
- (f) Point of return of water to stream _____
Describe in same manner as point of diversion.

(g) Remarks Snow Creek is not a living stream. It will be necessary
to store the waters thereof in a reservoir, as the stream bed is
dry during the greater part of the irrigating season.

DESCRIPTION OF PROPOSED WORKS

- Water is to be diverted by a dam 6 feet long and 4 feet high, and State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits. If water conveyed along the south boundary of the land to be irrigated in is to be stored in reservoirs, it should be so stated and the location of the reservoir should be given with reference to the legal subdivisions.
- a ditch 3 feet wide at the top, 18 inches wide on the bottom, one foot deep, and having a fall or grade of .8 of a foot in 1000 feet. The Reservoir will be situate in NW4 SE4, SW4 SE4 and Lots 3 and 4, Section 20, T 46 N R 18 E, M.D.M. Its area will be about 27 acres and its capacity about 100 acre feet. The natural channel of Snow Creek is to be used to convey the water from reservoir to point of diversion.
5. Estimated cost of works \$1750.00
6. Estimated time required to construct works Three years.
7. Remarks It will be necessary for me to secure right-of-way for the reservoir from the Government before I can safely begin construction work.

Curtis Mathews, Applicant.

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all prior rights on the source. The full statutory amount of 560 acre feet per annum for the 140 acres proposed to be irrigated is herein granted, but it is understood that such amount is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the number of acre feet actually stored for beneficial use each season. During the life of this permit records must be kept so as to show the average amount of water stored each season, and such records, together with such plats of the reservoir as may be required, shall be submitted with the proof of beneficial use. A substantial headgate and weir must be installed and maintained at or near the outlet of the reservoir in order to facilitate the measurement and control of the water. This permit is issued by the State Engineer for the storage of water in Nevada, but it is understood that said State Engineer maintains no jurisdiction over the irrigation of lands in California.

Work must be prosecuted with reasonable diligence and be completed on or before June 26, 1927.

Proof of completion of work shall be filed before July 26, 1927.

Application of water to beneficial use shall be made on or before

June 26, 1928.

Proof of the application of water to beneficial use must be filed with State Engineer on or before July 26, 1928.

WITNESS MY HAND AND SEAL this 26th day

Filed May 14 - 1923

of October, 1923.

Cancelled Sept 16, 1930 because of failure of applicant to comply with provisions of permit.

Geo. W. Maloney State Engineer

State Engineer.

DESCRIPTION OF PROPOSED WORKS

Water is to be diverted by a dam 6 feet long and 4 feet high, and
State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits. If water
 conveyed along the south boundary of the land to be irrigated in
is to be stored in reservoirs, it should be so stated and the location of the reservoir should be given with reference to the legal subdivisions.
 a ditch 3 feet wide at the top, 18 inches wide on the bottom, one
 foot deep, and having a fall or grade of .8 of a foot in 1000 feet.
 The Reservoir will be situate in NW4 SE4, SW4 SE4 and Lots 3 and 4,
 Section 20, T 46 N R 18 E, M.D.M. Its area will be about 27 acres
 and its capacity about 100 acre feet. The natural channel of Snow
 Creek is to be used to convey the water from reservoir to point of
 diversion.

5. Estimated cost of works \$1750.00

6. Estimated time required to construct works Three years.

CANCELLED

, Engineer.

The amount of water to be appropriated shall be limited to the amount
 which can be applied to beneficial use, and not to exceed 1.40
 cubic feet per second, or 560 acre feet per annum.

Actual construction work shall begin on or before June 26, 1924.

Proof of commencement of work shall be filed before July 26, 1924.

Work must be prosecuted with reasonable diligence and be completed on or
 before June 26, 1927.

Proof of completion of work shall be filed before July 26, 1927.

Application of water to beneficial use shall be made on or before

June 26, 1928. Proof of the application of water to beneficial

use must be filed with State Engineer on or before July 26, 1928.

WITNESS MY HAND AND SEAL this 26th day
 of October, 1923.

May 14 - 1923

Cancelled Sept 16, 1930 because of failure of
 applicant to comply with provisions of law.
